

We're the only ONE way to define heavy-duty. The difference is obvious between our schedule 40 steel pipe (right) and other batting cage manufacturer's tubing (left).

TUFFframe Tensioned Outdoor Batting Cage

There's no net-killing ricochet with only three support columns on each end and spaced beyond the net end panels. **And look ma, no ladders!** Winches make setup and take down super easy from the ground.

TUFFframe Tensioned Outdoor Batting Cage

FAST. Once the poles are set, it takes two people less than 10 minutes to install or remove the cage — without ladders. Our premium batting cage net is suspended between the poles while the Tenex top cables are tensioned by our winch and cable units to maximize hitting and pitching space. Remove the winch handles when it is in the intended position.

SAFE. Support poles are spaced beyond the net end panels, rather than along the cage sides. This eliminates ricochets from hit balls. And without side poles there is no more crushing of the net between a hit ball and the pole — the main cause of holes in the side panel netting. **Ships via freight and ready to install.**

Whether ordering "standard" or a batting cage to conform to your site, it's likely Beacon is your best and most affordable option. Tell us about your facility and your batting cage project and our team of experts will make sure it's done the way you need. Just send us your information.

PRODUCT FEATURES

- Standard sizes: 70' L **baseball** and 55' L **softball** by 14' W and 12' H
- Heavy-duty **schedule 40 steel pipe** uprights (3' net offset, see comparison photo)
- **Overload protection system** prevents damage to the uprights by limiting excessive cable loading
- Premium UV-treated **nylon cage net** with **vinyl reinforcement** and **end panel over-flap entrance**
- Pre-installed **fiber overhead cables** and **net** for quick and easy setup
- **Shared-pole multiple cage designs** any way you need — single, double, triple, side-by-side, end-to-end
- **Ground cables** hold net to the ground
- **12' x 8'** net protector included

Nets & Frames

FRAMES

Only heavy-wall galvanized steel stands up to it all. Designed around schedule 40 galvanized pipe uprights (see comparison image above). They're made from large diameter galvanized steel pipe, not the typical thin walled tubing used with other batting cages. Available single- or double-wide.

**If ordering uprights locally to save on shipping, we can provide specs for what you'll need.*

NETS

Our heavy-duty nets are tough, too. Designed in-house and made in the USA. They all feature heavy-duty end panels, vinyl reinforced joints, grommets hanging points in top section (perimeter and center), two large over-flap doorways and fully grommets bottom edge for staking. Optional lead rope can be sewn into bottom hem. Prefabricated, steel cables support our premium nets and speed installation.

“Beacon’s TUFFframe tensioned cage is an amazing batting cage. With the crank-pulley system we can easily remove the netting when the cage is not in use, and I love that the poles are only at the ends to prevent ricochet. **We absolutely love our double batting cages!**”

Marie Thomason – Head Softball Coach, Embry-Riddle Aeronautical Univ. (AZ)

Accessories

Add these options to get the most out of your tensioned cage, see [Batting Cage Accessories](#) for additional options:

- **Net Protector:** Net or vinyl panels hung on the batting end of the cage to reduce wear on cage net.

- **Soft-Toss Attachments:** Set of sock-net hitting stations and attachment hardware for one or both sides of cage — *stand alone units also available.*
- **Net Savers:** Helps prevent damage to your nets by avoiding destructive tie-down methods.
- **Artificial Turf:** Standard roll sizes with various material options.
- **Ground Sleeves & Caps:** For situations when the cage needs to be completely taken down, uprights and all.
- **Pitching Screens**
- **Outdoor Batting Cage Accessory Kit** Green 6' x 12' Hitting Mat without Home Plate, Pitcher's L Screen, and Green 7.5' x 7.5' Vinyl Net Protector.
