

Streamliner Pitcher's Circle Kit

Congratulations on purchasing the Streamliner Pitcher's Circle Kit. Follow these instructions to quickly secure the Hopper Bracket to your Streamliner Dryline Marker. Once that is installed you will simply attach the cable and you're ready to put down a great line – every time!

Parts:

Tarp Pin
Circle Cable with Bit Clip
Hopper Bracket
Bolts, Washers, Nuts

Tools Needed:

Phillips Screw Driver
Drill with 3/8" Bit
1/2" Box End Wrench

Attaching the Hopper Bracket

Depending on how old your Streamliner is, you may or may not have drilling indicators on the sides of your machine. The drilling indicators are located just above the Rear Wheels on the side of the Hopper. The Hopper Bracket will be mounted to one side of the Streamliner. If you want to chalk walking clockwise around the rubber, choose the right side of the hopper to attach the Hopper Bracket. If you want to chalk walking counter-clockwise around the rubber, choose the left side of the hopper to attach the Hopper Bracket.

For Hopper with Drilling Indicators

Locate the drilling indicators, drill out the two marked sights with a 3/8" drill.

For Hoppers without Drilling Indicators

Measure 1.5" inches above the Rear Wheel, centered directly over the Rear Axle and draw a 3" line, parallel to the ground. Using the Hopper Bracket as a guide, locate and drill 2 – 3/8" holes to mount the bracket.

Mounting the Hopper Bracket

Using the supplied hardware, insert the bolts through the Hopper Brackets and the holes drilled in the Hopper. Orient the Hopper Bracket as shown in photo. Using a washer and Locking Nut, secure the Hopper Bracket to the Hopper using a Phillips Screw Driver and 1/2" Box End Wrench.

Getting Ready to Line Your Field

Attach the Circle Cable to the Hopper Bracket using the Bit Clip that is attached to one end of the Circle Cable. Using Tarp Pin (included), pin the other end of the Circle Cable to the front, center, of your Softball Pitching Rubber. Place your Streamliner so the Circle Cable is fully extended. Select the width and volume for your line. Chalk the line keeping the Circle Cable taught. *Hint: Slightly lift front wheels to allow Streamliner to track in circle pattern.*
