

DURA-EDGE

PLATINUM

CALCINED CLAY
TOPDRESSING
FOR INFIELDS

OFFICIAL CALCINED CLAY OF MINOR LEAGUE BASEBALL

Consistency of particles deliver

PRO PERFORMANCE.

DuraEdge Platinum is engineered to be the most consistent medium gradation particle size **topdressing**. Reduced fines and smaller particles means more coverage and less clumping when dragging in wet conditions. Higher density and hardness results in less breakdown, less migration of particle and that equates to fewer applications and less contamination.

- 100% natural earth product
- Larger particles screened out for a more refined, professional playing surface
- Fines removed for a very clean, uniformly-sized topdressing material
- Baked over 1300° F for industry-leading particle durability
- Lasts longer on the field so you use less throughout the season

INFIELD SKIN APPLICATIONS

- Infield skin topdressing
- Infield skin drying agent

TURFGRASS APPLICATIONS

- Till into native soil rootzones to relieve compaction
- Topdress & drag into sand rootzone after aeration
- Topdress & drag into turf after aeration to improve nutrient and water holding capacity
- Can be used in Drill & Fill and DryJect machines

CALCINED CLAY TOPDRESSING FOR INFIELDS

▶ PRESEASON INFIELD PREP

1. **Ensure infield skin** has been properly graded and compacted for positive run off.
2. **Apply Platinum** to your infield according to the *Usage Table* below based on your infield size and the depth of topdressing. *Do not maintain more than 1/4" of topdressing on the surface of your infield skin.*
3. **Scarify or nail drag** Platinum topdressing into top 1/4". *Do not till as an amendment.*
4. **Finish drag** for consistent coverage across infield skin.
5. **Call 866-867-0052** with questions and more recommendations.

▶ IN-SEASON DAILY MAINTENANCE

1. **Maintain 1/4"** coverage of Platinum on top surface.
2. **Maintain even moisture** throughout infield profile with heavy "flood watering" after last game.
3. **Light nail drag** in morning with proper moisture.
4. **Finish mat drag** and maintain even moisture until game time.
5. **Add topdressing as needed** to maintain consistent coverage.

▶ WET FIELD CONDITIONS

1. **Apply Platinum** to wet areas and allow topdressing to absorb excess moisture.
2. **Rake or drag smooth.**
3. **Remove excess** the next day if topdressing exceeds 1/2".
