

DURA-EDGE

PRO-DRY

CALCINED CLAY
DRYING AGENT
FOR INFIELDS

You'll get powerful absorption with **NO CLEAN-UP.**

ProDry is engineered to quickly remove standing water. Our screening process removes very fine particles and dust meaning this material can be dragged in the following day without compromising the integrity of your infield skin. In addition to water removal, ProDry will leave a clean, finely manicured appearance without creating a layering effect.

- Rapid moisture uptake to get you back on the ballfield faster!
- Very clean — no unhealthy powdery dust to breathe in
- Baked over 1300° F for industry-leading particle durability
- No removal necessary after use, simply drag into existing topdressing
- Tightest gradation small calcined clay particles with minimal fines

INFIELD SKIN APPLICATIONS

- Infield skin topdressing
- Infield skin drying agent

TURFGRASS APPLICATIONS

- Till into native soil rootzones to relieve compaction
- Topdress & drag into sand rootzone after aeration
- Topdress & drag into turf after aeration to improve nutrient and water holding capacity
- Can be used in Drill & Fill and DryJect machines

CALCINED CLAY DRYING AGENT FOR INFIELDS

▶ WET FIELD CONDITIONS

1. **Before applying any ProDry Drying Agent**, remove as much water as possible from puddles by first using puddle pillows or puddle pumps.
2. **Apply ProDry to wet areas** and allow drying agent to absorb excess moisture.
3. **Rake or drag smooth.**
4. **Remove excess** the next day if topdressing exceeds 1/3".
4. **Apply drying agent to puddles** in turfgrass and rake surrounding area. Turfgrass will fill in, eliminating low areas.

SEEING IS BELIEVING

We put DuraEdge ProDry to the test against a leading competitor. Which would do the better job of absorbing puddles quickly?

The test left no doubt: ProDry absorbed water in just seconds.
